ACADEMIC QUALIFICATIONS			
Year	Qualification	Institute	Percentage
2028	B.Tech	Universal Ai University, Mumbai	Pursuing
2024	12th	Amber International School	75%
2022	10th	Sanskar Public School	89%

INTERNSHIPS		Total Duration- 2 Months
Bluestock Fintech	Software Developer Intern	May 2025 – July 2025
- Analyzed financial market data using Python and Excel to identify investment trends. - Conducted equity research and prepared company performance reports. - Assisted in building financial models and investor pitch decks. - Organized and automated datasets to improve research efficiency. - Collaborated with team members to provide data-driven insights for portfolio strategies.		

SMART Project Education Vertical	Nov 2024
- Conducted field visits to rural villages to study community infrastructure and living conditions. - Collected and analyzed data on water supply, electricity, and livelihoods through interviews. - Collaborated with a team to propose sustainable development improvements. - Developed communication, field research, and teamwork skills.	

Projects
Krush-Mitra AI - Developed a smart farming web application using React.js, Flask, and Python. - Implemented machine learning-based crop yield prediction and NDVI crop health monitoring. - Built an AI Plant Doctor using TensorFlow for plant disease detection. - Deployed scalable application on AWS EC2 using Docker and MongoDB Atlas.
Gridium Protocol https://github.com/YashPandit09/Live-Ai - Developed a decentralized AI-powered energy microgrid enabling peer-to-peer electricity trading. - Implemented Solidity smart contracts with zk-SNARK verification for secure energy transactions. - Integrated a reinforcement learning (DDPG) agent using PyTorch for dynamic grid stability. - Built real-time visualization dashboard using React, Three.js, and WebSockets.
Agentic AI Misinformation Detection System - Built an Agentic AI system to detect financial misinformation from news and market data. - Developed ML pipelines using Python, FastAPI, TensorFlow, and Gemini API. - Implemented PostgreSQL (Supabase) database and AWS deployment for real-time analytics dashboard.
E-Commerce Website https://github.com/YashPandit09/KGW - Developed a responsive e-commerce website for Kulswamini Grinding Works using React.js, HTML, CSS, and MySQL. - Improved online visibility and customer accessibility for the business.

- **Arduino Fire Robot**
 - Designed an autonomous fire-extinguishing robot using Arduino Uno and infrared sensors.
 - Implemented sensor-based fire detection and relay-controlled extinguishing mechanism.
-
- **Solar IoT Plant System**
 - Developed a solar-powered IoT plant care system for automated watering and misting.
 - Implemented sensor-driven automation to reduce manual plant maintenance.

ADDITIONAL SKILLS

Certifications	• edX Verified Certificate for AI Chatbots without Programming • edX Verified Certificate for Introduction to Cloud Computing • edX Verified Certificate for AI for Everyone: Master the Basics
Skills	• Python Programming & OOP Concepts • Machine Learning & AI Model Development (TensorFlow) • Data Analysis using Pandas & NumPy • Reinforcement Learning Fundamentals • Web Development – React.js, HTML, CSS, JavaScript • Backend Development – Flask, FastAPI • Git / Github • Database Management – MySQL, MongoDB, PostgreSQL • Cloud & Deployment – AWS EC2, Docker • Blockchain Development – Solidity Smart Contracts • IoT & Embedded Systems – Arduino, Sensors • Microsoft Excel & Data Visualization

ACHIEVEMENTS & EXTRA-CURRICULAR

- Held key leadership roles as House Captain, Scholastic Head, and Discipline Incharge, fostering teamwork, discipline, and event management in school.
- Team Leader of SMART Project at University
- Head of Operations in a University Club.
